

“Providing innovative solutions for today's business needs”

We are dedicated to providing the industry knowledge and technology consulting services needed to help our clients improve productivity, increase the return on their investments, gain competitive edge, and simply position them to be successful at what they do best.

Software Tactics, Inc.

A P P R O A C H

We focus on practical solutions to our clients' particular problems. By providing the specialized research, risk assessment, knowledge of competitive strategy necessary to overcome specific challenges, and expertise in executing each step of the technology development lifecycle, we generate the solutions demanded. By tailoring services to meet client needs, we provide an unparalleled combination of industry-specific consulting and technological solutions. To tackle a specific problem on hand, we apply appropriate SDLC model, including, waterfall, spiral, and RAD.

DISCOVER

To ensure delivery of a high-quality solution that meets the client's needs, we collaborate with system users to understand and capture their specific functional and technical requirements.

DEVELOP

The development team with cutting edge technology background and expertise develops and integrates object oriented modules, ensuring that all of the requirements are met with the highest level of quality.

DESIGN

Our experienced software engineers translate business requirements into development specifications, which may contain details such as use cases & screen prototypes, system architecture, and database schemas.

DELIVER

Testing is a fundamental part of software development where we ensure the best quality system goes into user acceptance testing. After users approve the software, we release it and stand ready to eliminate any defect arising in production environment.

TACTICAL SOFTWARE SOLUTIONS TAILORED TO YOUR NEEDS

STI's reputation is built on acknowledging the changes in industry and anticipating the challenges that our clients face. STI's consultants combine up-to-the-minute industry expertise with innovative, practical solutions. These vital services enable our select clientele to maximize resources and increase efficiency. In short, STI provides a dynamic combination of winning business strategies and cost-effective solutions that position our clients for success.
